

I would first like to thank the FAA for deciding to take a stand with this important issue on animals and air transportation. Glad your organization is issuing a proposed rule to implement the requirement of allowing the public to see monthly reports on animals and travel incidents. I urge you to finalize the rule AS QUICKLY AS POSSIBLE!!

I am quite concerned that this proposed rule only applies to pets of U.S. families (even though legislation allowed for other animals, such as ones going to zoos, pets from other countries, etc. to be covered). I am asking you, in your final rule, to define "animal" much more broadly. Thank you again, and your help is very much appreciated.
